

ENVIRONMENTAL POLICY

- To comply with the environmental legislation in our country and to follow updates,
- To ensure measurable sustainable development in every possible area of the environment,
- To identify environmental dimensions, types and harms of environmental impacts,
- Minimize pollution and waste and ensure that the hazardous waste is minimally degraded and disposed of,
- To provide continuous training to our employees and subcontractors and to encourage them to implement these principles,
- To identify goals and objectives in this direction and explain annual progress every year,
- To continuously improve our environmental management system in the light of these principles.

These principles will be announced to the public by means of communication facilities and will be open to public opinion.

Our management will be a continuous follower of the implementation of the environmental policies and objectives to which we are committed.

GENERAL MANAGER
